

Dash Dynamic Universal Charger

Get the fastest and most convenient wireless charging for implantable medical devices. Dash Dynamic delivers wirelessly recharging over a large charge range to improve compliance, boost clinical outcomes, and grow adoption.

Make your device the 1st choice for clinicians and patients without compromising functionality or patient experience.

The Difference Inside

Dash Dynamic is built on our industry-leading wireless technology platform, which combines core innovations in coils, power electronics, magnetics, and data transfer capabilities.

Get unprecedented performance and a faster, lower-risk path to market. Reach out to discuss what's possible.

Applications	Neurostimulators, ICDs, pacemakers, neural implants, and more
Max. Output Power	3.5 W over full charge range
External Hub Size	150 grams 70 mm diameter x 15 mm height
Implant Depth and Misalignment	Up to 5-6 cm $\pm$ 2 cm misalignment Up to 35° tilt misalignment
Implant Battery	lithium-ion battery
Operating Frequency	6.78 MHz, within ISM band
Integrated Communication	Bidirectional
API	-USBC engineering interface -Bluetooth API for App development -UI includes visual and audio alignment, status feedback, and more
MRI Compatible	Yes, 1.5T/3.0T for implant
Compliance	IEC 60601, ISO 14708, and FCC Part 15 and 18
